Automotive foam tape

Automobile foam tape

PE foam tape, EVA foam tape, Acrylic foam tape

Automotive foam tape introduction

JT acrylic foam double sided tape, PE/EVA foam double sided tape offer perfect solutions for all kinds of automotive body inside and outside modules, components and parts assembling and taping. Super high adhesion resistance and peel adhesion, excellent heat resistance, humidity resistance and UV resistance, which can make JT adhesive tape widely used in automotive inside and outside seals, decoration strip, lamp cap, windows visor, wheels guard, fender, wheels

balancers, nameplates and license plate, etc.

Automotive foam tape description

PE, EVA or Acrylic foam tape is PE foam, EVA foam or Acrylic as backing, coated on single side or both sides with strong solvent acrylic adhesive, covered with PE plastic film or yellow silicone paper or white silicone paper or glassine silicone paper as release paper liner.

Automotive foam tape features:

water resistance, insulation, sound absorption, easy die cutting, High adhesive, heat resistance, shockproof, sound resistance, strong stick, UV resistance, moisture proof, excellent performance for vibration and anti-crack, good weather resistance and anti-chemicals, Easy for use

Foam tape application advantages in automotive

Optimize outside decorating parts structure design, change the appearance, optimize body structure, reduce the whole weight and improve the sealing performance, economic and environment friendly.

Double sided foam tape can fill the gap and distribute the pressure in the sticking surface, with excellent sealing performance, cushion, damping, shock resistance, high heat resistance and high isolation performance.
